CargoSprint

SprintPass Pro

SprintPass Pro allows shippers, logistics service providers, and motor carriers to automate terminal interactions while streamlining drayage operations through integrated cargo visibility, fee settlement, and automated appointment scheduling.

The solution reduces manual coordination, adapts to real-time terminal conditions, and helps keep cargo moving with fewer delays and less friction.

Benefits of SprintPass Pro:

One Connected Experience

Fewer Surprises, More Predictability

Adapt in Real Time

Greater Operational Control

Reduced operational impact

Visibility
Integrated real time container status and terminal lifecycle events

- Enables container execution process
- System watches and orchestrates, reducing human intervention during execution process
- Full visibility from vessel discharge through terminal out-gate
- Visibility to holds and container LFD

Fees
Eliminate manual payment workflows with automated fee settlement

- Automatically identifies and pays terminal fees
- Payment good through date aligned with appointment scheduling
- Prevent costly terminal delays
- Pay with confidence

Appointments
Automate and streamline scheduling to keep cargo moving

- Automate appointment scheduling based on predefined preferences
- Centralizes bookings across multiple terminals and systems through TMS integration
- Enables flexibility in motor carrier execution
- Reduces dispatcher workload
